

How to estimate green roofs/walls value?

GENESIS- Green roofs/walls ENvironmental , Economic and Social Savings

Modelling Uncertainty and Investors/Users Preferences in all-inclusive Cost-Benefit Analysis of Green Roofs/Walls

Task 1 - State of the art (18 months)

Learning from the contrasting results

Task 2 - Development of innovative cost-benefit modelling covering uncertainty and multi-criteria (28 months)

Initial and long term costs

Environmental, economic and social benefits

INVESTMENT

ENF OF LIFE

Task 3 - Case studies (22 months)

Case studies with strong replication

Before

After (simulation)

Task 4 - Dissemination (36 months)
